

# PARTICIPANTS NEEDED

Research participants are needed for a study investigating **substance abuse, cognitive control, and brain responses.**

## Involves:

Single session (up to 2 hours):

Playing computerized games while we record your brainwaves (EEG) following the application of transcranial magnetic stimulation (TMS)

Participants are **financially reimbursed** for their time (**\$25/hour**)

To participate you must:

- Be **over 18 years old**
- Have a **current or past history of opioid dependence (e.g., heroin, oxycontin, fentanyl)**
- Speak English as your first language

Testing is conducted at:

Center for Molecular and Behavioral Neuroscience  
Rutgers University Newark

If you are interested in hearing more about the study or to check whether you are eligible, please contact Kathryn Biernacki, PhD or Travis Baker, PhD
