Participants wanted!

Are you available for 4 hours in the next 2 months? We are looking for **participants** in an experiment that investigates how we navigate and make decisions. You must be 18-35 years old, right-handed, and speak/write English.

The study involves:

- Up to **Two 1-2 hours sessions over a period of two months.**
- Playing a few computerized tasks while your lie in a magnetic resonance imaging (MRI) machine, a safe method for recording brain structure and activity, which require you to lie inside a narrow tube and hold still for up to about 60 minutes.
- Playing computerized games will we record your brainwaves (EEG) during these games.

RUTGERS

The Neural Basis of Goal-directed Navigation

Electrophysiology and Neuromodulation Laboratory

Center for Molecular and Behavioral Neuroscience

This study will take place at the Center for Molecular and Behavioral Neuroscience, Rutgers University Newark. Each participant will get paid $25/hour for EEG-MRI session, and $15/hour for behavioral experiments to compensate for time and inconvenience. If you are interested in hearing more about the study, or whether you are eligible, please email Malte Gueth: neurostimlab@gmail.com Thank-You
